

# Segment: Legacy Stable Value Policies

Business segment description for life insurance policy cohorts. Use this document to infer assignment logic and produce explainable segment labels.

- Older policies with long tenure, stable payment behavior, and either cash value or high loyalty signals.
- These policies are not necessarily low value; they may require retention messaging, beneficiary review, or product education.
- High confidence signals include duration above 84 months, low missed payments, autopay, agent touch, and stable active status.

| Signal          | Description                             |
|-----------------|-----------------------------------------|
| Duration        | 84+ months since issue                  |
| Behavior        | Low missed payments and autopay enabled |
| Relationship    | Agent touch in last 12 months           |
| Suggested label | legacy_stable_value                     |
